Problem Statement:

Whenever we visit a barber/salon, we have to wait for a very long time in unorganized queues, which is very tedious and frustrating. The queue waiting times in salons can range from anywhere between few minutes to multiple hours, depending upon the day. This time could otherwise be used productively if the problem is provided with a solution. Another problem we often face is that after the hairstyle is done we might not like it. So, a feature is needed where we can try hairstyles prior to actually getting them.

Solution Statement:

Our app Stylelegant would help user to style up elegantly, by acting as a medium between salons/spas and the end-customers, i.e. the user. It would help you to book available slots in salons/spas and would also give suggestions to you. You can set a reminder for your booked slot and don't need to wait in long queues.

Also as an additional feature, we have added a feature where the app designs your 3D Modelled Face using your camera. Using this, one can try multiple styles before getting them, so that they do not have to regret later.

TASKFLOW

Note: The green boxes represent the clickables to follow the taskflow

1. User opens the StylElegant app and clicks on Book/Reschedule.

2. User clicks on Habib's Salon.

4. User clicks on Date on left Barber slots and selects the date 28 July 2020. Click anywhere on the screen to close overlay.

5. Then the user clicks on the slot of Barber Mr. Prashant from 10:00-11:00 am, slot turns green and then the user clicks on Confirm.

5. User gets an option to pay at the moment using card/UPI or pay later at the Salon and the user clicks on Pay at Salon.

6. User click on Book.

STYLELEGANT

7. To set reminder user clicks Set a Reminder and then click anywhere on the screen to close the overlay. To try 3D face styling features, user clicks on Try 3D styling on the same screen.

8.On 3D styling page user clicks open the drop down menu and clicks on first picture of hairstyle in Trending to try it.

9. User clicks on Confirm and Send.

10. User visits the Salon.

11. When he comes back, he opens the home screen and clicks on the star icon in the bottom menu to review his experience at salon.
